

Comfortably talk to people in foreign languages!

Multi-person & language simultaneous translation service

SmaLingual^{PRO}

SmaLingual PRO

- ✓No need for a dedicated machine. Use SmaLingual as a native or web app
- ✓Two selectable input types: voice and text!
- ✓Easily handle translation at multilingual meetings with many people!

SmaLingual PRO use cases

SmaLingual PRO is a simultaneous translation service for multiple people and multiple languages. It's useful in various business situations, such as 1:n simultaneous interpretation for tourist guides (one interpreter, many tourists) or meetings between people in different languages. Scan the QR code and enter the same chat room. You can log conversations to later use them as meeting minutes.

For guiding foreign tourists

As a tool for in-house multi-person meetings

When dealing with foreign customers at a call center

Simultaneously translate conversations between lots of people, chat room style!

1 Scan a QR code

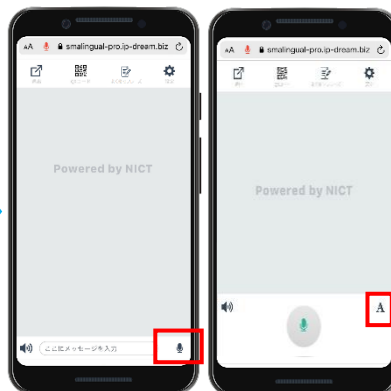

① You can join a chat room by scanning a QR code or following the room's URL.

2 Select a language

② Choose your language.

3 Enter a message

③ Speak or type what you want to say. You can change the input method by pressing the [A] and [🎤] buttons on the right. When you press the [🎤] voice input button, the button turns into [A]. When you've finished speaking, press the button again to send your message.

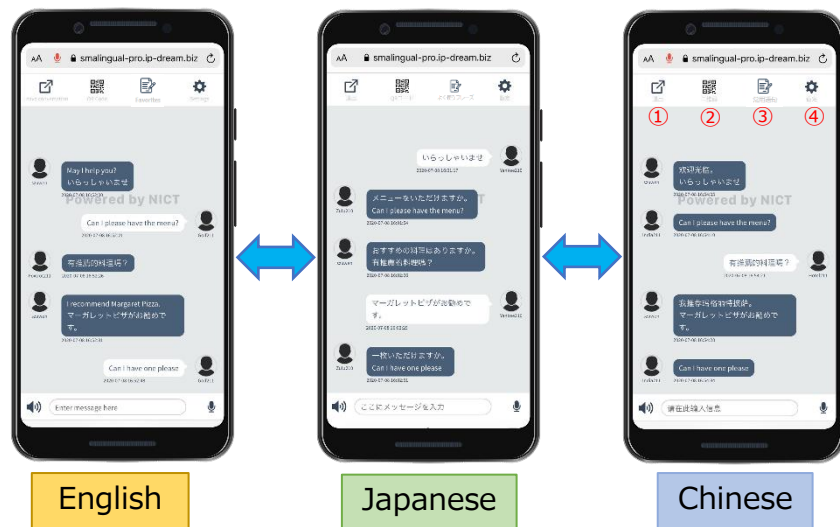

4 Start the conversation!

④ Messages and their translations will be displayed.

Communicate internationally as if you were speaking the same language!

For example, Japanese restaurant staff can use SmaLingual PRO and ask a foreign customer to read the QR code, and enter the same chat room. Although staff and customers speak different languages, their words will be translated. They will easily go beyond the language barrier.

Button	Function
1	End the conversation.
2	Display the QR code. Use it when you want to invite other people.
3	Display frequently used phrases.
4	Display the settings menu.
