- ✓ Log in directly without ID or password input

## SmaLingual Single use cases

With SmaLingual Single, the multilingual translation service, you can communicate with people who speak different languages using your smartphone or tablet. With the direct login function, simply scan the QR code you have received and use the system immediately! Save time and effort in managing IDs and passwords and logging in. Start translation immediately, without keeping customers waiting at busy café counters, hotel front desks, and so on.

When serving customers  
in cafes and restaurants

At travel information  
counters

Sales counters

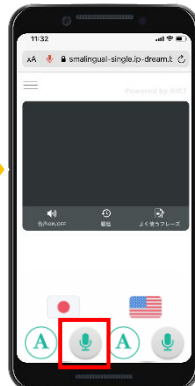

Use your device at hand to communicate with foreigners right away!

1 Log in directly  
via QR code

2 Press the  
Microphone  
Button

3 Talk

4 Translation  
complete!

① Start the camera and scan the QR code for direct login. When the connection URL is displayed, access it and press the [Login] button.  
※ If you bookmark the Direct Login screen, you won't need to scan the QR code again.

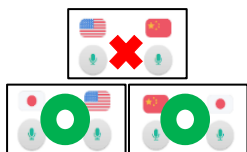

② Press the microphone under the flag of the language you speak.  
※ If it is difficult to use voice input due to noise or other ambient problems, tap [A] to use text input.

③ When the microphone button turns green, speak into the phone's microphone. Tap the button again when you are done speaking. If you mispeak, you can abort the process by pressing the [Cancel] button.

④ The source phrase, its translation and, at the bottom, the reverse translation to the original language are displayed.

# Main screen buttons and language switching

Multilingual support!

Note: combinations of languages that do not include Japanese, such as English and Chinese, are currently in development.

Button	Function
1	<p>Display the menu screen. Access Help/Inquiry/Settings etc. menus. When you have finished using the system, press "Logout" from the menu screen.</p>
2	<p>The words inputted using the left-side text/microphone button can be saved as Frequently Used Phrases.</p>
3	<p>Translation result vocalization result.</p>
4	<p>Toggles post-translation vocalization ON/OFF. ON: translation is vocalized automatically. OFF: translation is not vocalized. ※ The button shown in 3 cannot be used.</p>
5	<p>Display conversation history.</p>
6	<p>Lists previously saved long phrases.</p>
7	<p>Select language. ※ Not available in combinations of languages other than Japanese, such as English and Chinese. You must select Japanese for either one.</p>
8	<p>Begin text input (A) / Voice input (Microphone) Press [A] to display the Text Input Field. When you have finished typing, press the paper airplane symbol on the right side to send it for translation. ※ For voice input, please refer to the first page.</p>

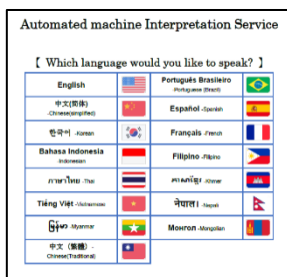

## Supported languages

1	Japanese	9	Burmese
2	English	10	Portuguese (Brazilian)
3	Simplified Chinese: PRC	11	Spanish
4	Traditional Chinese: ROC	12	France
5	Korean	13	Filipino
6	Indonesian	14	Khmer
7	Thai	15	Nepali
8	Vietnamese	16	Mongolian

## Use example at a cafe counter

- When an international customer arrives at the store, the staff takes out the tablet and launches the browser.
- They access the direct login screen that was bookmarked in advance, and log in without entering ID or password.

- Confirm the client's language on the language selection card. Staff sets SmaLingual's display language.

- Saved phrases to explain how to use the system.
- Conversation with the customer while handing over the tablet.

## Five reasons why we recommend using SmaLingual Single in stores

**01** All you need is a single tablet! Quick handling and instant translation when needed, even in small space. Can be used anywhere in the store.

**02** No cumbersome login process! No need to enter ID and password. Can be used in as few as 4 steps.

**03** Simple screen for intuitive operation!

**04** No need to worry about whether the message comes across or not with the reverse translation function!

**05** Save phrases for possible questions and respond smartly.
